

MADESH RAM R

Software Engineer | .NET Core & Full-Stack Developer

Chennai, Tamil Nadu, India | +91 6374407398 | maddymaddy2679@gmail.com | [linkedin.com/in/madesh-ram](https://www.linkedin.com/in/madesh-ram)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years building enterprise web and desktop applications on C#, .NET Core/Framework, ASP.NET MVC, React.js, and MS SQL Server. Experienced designing secure REST APIs, optimizing SQL performance, and deploying through Azure DevOps CI/CD. Comfortable using AI coding assistants (GitHub Copilot, ChatGPT) to speed up delivery without compromising code quality.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Framework 4.8, .NET Core, ASP.NET Core/MVC, Web API, Windows Forms

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap

Backend & Database: Entity Framework Core, ADO.NET, LINQ, MS SQL Server (stored procedures, triggers, query optimization)

Cloud & DevOps: Azure DevOps (Boards/Repos/Pipelines), Azure App Service, Key Vault, Service Bus, Function Apps, Event Grid, AI Search

Practices & Tools: JWT auth, REST security, OOP, SOLID, Clean/MVC Architecture, Agile Scrum, Git, Postman, CI/CD

AI-Assisted Dev: GitHub Copilot, ChatGPT, Claude — prompt engineering, workflow automation (learning: OpenAI API integration)

WORK EXPERIENCE

Software Engineer II — Logic Valley

June 2023 – Present

Enterprise Debt Collection Management System — case management, government payment processing, compliance & enforcement workflows for multiple clients

- Built and maintained REST APIs and business modules on ASP.NET MVC/.NET Core, React.js, and Windows Forms, supporting 10,000+ concurrent users across government and enterprise clients.
- Optimized SQL Server stored procedures and queries for high-volume transactional workloads, cutting average query time by 60%.
- Integrated Azure Key Vault, Service Bus, Function Apps, Event Grid, and AI Search to modernize secure configuration, async messaging, and intelligent, reducing manual operational effort by approximately 40%.
- Owned CI/CD release management through Azure DevOps Pipelines, contributing to reliable production deployments with approximately 30% fewer deployment issues and rollbacks.
- Diagnosed and resolved production issues across the stack, improving system reliability for 20+ client environments.
- Leveraged GitHub Copilot and ChatGPT to accelerate feature development, SQL optimization, and debugging, reducing average development time by approximately 25%.
- Partnered with Business Analysts, QA engineers, and stakeholders in Agile Scrum to deliver features on a 2-week sprint cadence.

EDUCATION

Bachelor of Commerce (B.Com) — Prince Shri Venkateshwara Arts and Science College

84% | Self-directed into software development through hands-on project work and continuous learning
